Tolin Its a great book but the author never meant you to pay over 5-9 times the price marked on the back. It may be out of print but not all places have it jacket up so high. You will have to use a copier to enlarge all patterns (FYI). 3 of 3 people found the following review helpful. Some amazing clocks By Ron Killian I really enjoyed this one. You won't find a large selection, but the ones he has included are outstanding. Be warned, these are not something a beginner could whip up right away, as they are quite detailed. But I think well worth the work in the end. My only complaint, a small one is that some of the drawings seem a little "dirty", the lines were not as clear. But if you enjoy some detailed

scroll projects, you'll probably like this one. 1 of 1 people found the following review helpful. **Advanced Scroll Saw Clocks: Measured Drawings for Five Antique Samples** By Joseph M Hall Very good book with great works of art for Scroll saw clocks. A must for advanced level clocks that will sure to stand out wherever you put them. Great seller.

Antique scroll saw clocks sell for \$5,000 to \$8,000. This new pattern collection outlines the steps and techniques necessary to replicate these splendid collectibles. Full-size patterns for each clock are provided, and each pattern is shown in full color.

About the Author John A. Nelson is considered a master craftsman by scroll saw enthusiasts and is a frequent contributor to *Scroll Saw Woodworking Crafts* magazine. He is the author of 10 books about scroll sawing, including *The Complete Guide to Making Wooden Clocks*, *50 Easy Weekend Scroll Saw Projects*, *Making Wooden Baskets on Your Scroll Saw*, and *Inspirational Scroll Saw Projects*. John has spent thousands of hours at the scroll saw, authored dozens of patterns, and built some of the most beautiful examples of scrollwork to be found.
